

Integer plastic-slip content of the two large avalanches

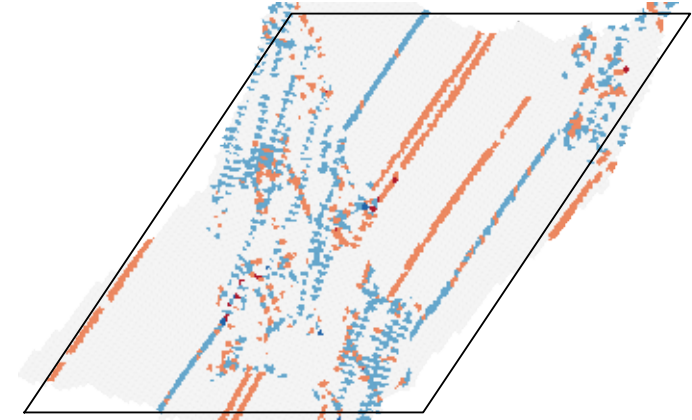

Plastic reconstruction T_{total}
 $\gamma = 0.66 \rightarrow 0.67$; nonzero: 3,971; outside: 8

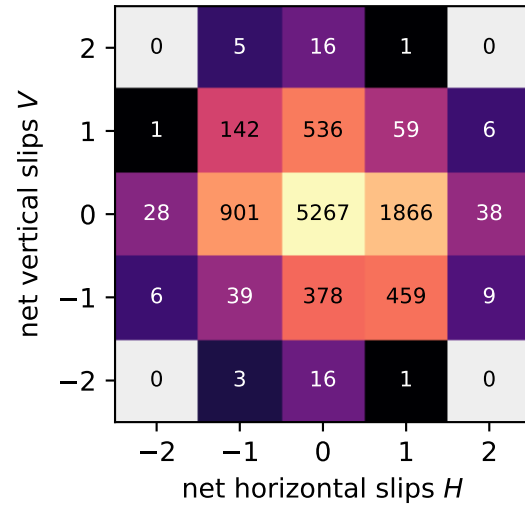

Plastic reconstruction T_{total}
 net H field at $\gamma = 0.67$; 7 values saturated

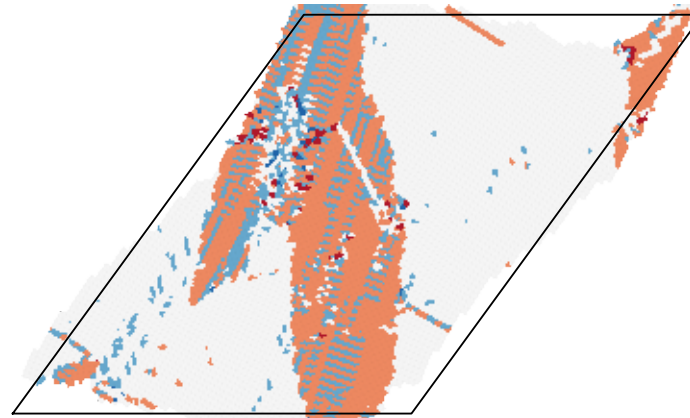

Plastic reconstruction T_{total}
 net V field at $\gamma = 0.67$; 1 values saturated

Direct history $\mathcal{F}$
 $\gamma = 0.72 \rightarrow 0.73$; nonzero: 4,533; outside: 23

Direct history $\mathcal{F}$
 net H field at $\gamma = 0.73$; 18 values saturated

Direct history $\mathcal{F}$
 net V field at $\gamma = 0.73$; 5 values saturated
